

**SUMMARY OF PROPOSED AMENDMENTS TO THE
ARKANSAS ELEVATOR SAFETY RULES AND REGULATIONS**

December 10, 2007

Regulation 010.05-011

The first proposed Code change adopts the new 2007 version of A17.1 which covers new construction and installation. The current Code standard is A17.1 - 2004 and 2005 Supplement and 2005 Addenda. A17.1 - 2007 primarily incorporates the 2005 Supplement and Addenda into the Code.

The second proposed Code change adopts ANSI/ASSE A10.4 - 2007, Safety Requirements for Personnel Hoists and Employee Elevators. A10.4 only applies to temporary elevators and hoists set up for the purpose of demolition and construction projects. Many of the requirements for these elevators are contained in current Codes. The new Code sets out more specific standards for these types of devices.
